PROFESSIONAL SUMMARY

Front-End Developer with 2.5+ years of experience building responsive, scalable web applications. Proficient in React.js, Svelte/SvelteKit, JavaScript (ES6+), GraphQL, PostgreSQL, Node.js, and modern design systems (Shadcn UI, Tailwind CSS). Experienced in system design, frontend architecture, and data structures & algorithms in JavaScript. Passionate about delivering high-quality code, performance-focused UIs, and intuitive user experiences.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript (basic)

Frontend: React.js, Svelte, SvelteKit, HTML5, CSS3, Tailwind CSS, Shadcn UI, Bootstrap, Axios, Fetch API

Backend: Node.js, Express.js, RESTful APIs, GraphQL

Databases: PostgreSQL, MySQL

Tools & Platforms: NPM, Babel, Postman, VS Code, Git, GitHub, Vite

Concepts: System Design, Frontend Design Systems, DSA in JavaScript, Agile Methodology, Jest (basic)

PROFESSIONAL EXPERIENCE

Software Engineer - Chipprime Semiconductor Pvt. Ltd, Bangalore

Centralized Task Tracker, ADE DRDO, Bangalore | Sep 2026 – Present *Tech Stack: Svelte, Shadcn UI, Tailwind CSS, JavaScript, Node.js, GraphQL, PostgreSQL*

- Built a Jira-like centralized task tracking system enabling teams to create, assign, prioritize, and track issues across projects with real-time status updates.
- Developed a fast, reactive frontend using Svelte and SvelteKit with server-side rendering, leveraging Shadcn UI and Tailwind CSS to deliver a consistent and accessible design system.
- Designed and implemented a GraphQL API with Node.js for flexible, efficient data fetching, replacing over-fetching patterns common in REST-based solutions.
- Architected the PostgreSQL database schema to handle complex relationships between users, projects, sprints, tasks, and comments with optimized query performance.
- Built a reusable project template system allowing teams to create standardized task structures, labels, and workflows that can be applied instantly to new projects, reducing setup time significantly.
- Implemented project creation and user registration flows, enabling admins to set up new projects, invite team members, and assign roles with defined access levels within the platform.
- Developed a real-time project status tracking dashboard displaying task counts, assignee workloads, and completion progress per project, giving managers a clear overview of team activity.
- Implemented a task status workflow engine supporting four stages — New → In Progress → Review → Finished — with transition rules, timestamp logging, and visual status indicators on the kanban board.

Junior Software Engineer - Transvision Software And Data Solutions Pvt. Ltd, Bangalore

Global Weather Dashboard, SDSC SHAR ISRO | March 2023 – June 2025

- Developed a centralized real-time weather monitoring dashboard and archival system, integrating data from various Meteorological sensors under a single web portal.
- Built live, historical, and data analytics dashboards with dynamic visualizations (line, bar, and other chart types) using Highcharts and other charting libraries.
- Wrote data acquisition scripts to fetch readings from MET sensors and persist them in the database reliably.
- Implemented real-time sensor status monitoring and automated Surface and Launch Commit Criteria (LCC) data generation from sensor data.
- Integrated and archived global weather data including Satellite Images, derived meteorological products, and DWR images from a network of stations.

PROJECTS

Shopping Cart App | React.js, JavaScript, Tailwind CSS, Bootstrap Jun 2025 – Aug 2025

- Built a responsive shopping cart app using React and Bootstrap, allowing users to browse products, manage cart quantities, and remove items.

- Implemented a real-time search bar that filters products from a full list by name or category, displaying only matching items in the product grid.

Temple Management system | React.js, JavaScript, Tailwind CSS, shadcn UI, Postgresql, GraphQL, Node.JS

- Manages temple activities such as pooja bookings, seva bookings, festivals, and devotee registrations.
- Handles online donations, payment tracking, receipts, and financial reports.
- Maintains temple assets, inventory, gold/silver records, employees, and volunteers.
- Provides a secure dashboard with role-based access, notifications, and analytics.

EDUCATION

B.E. Computer Science and Engineering — CGPA: 7.9

KLE College of Engineering and Technology, Chikodi, Karnataka | 2017 – 2021
